

Teen Shelters

Applications

- Parks
- Leisure Areas
- Play Areas

Specification

The popular **Octagon Shelter** is constructed from tubular uprights with a sheet steel plated box section roof and heavy duty vandal proof mesh infill panels. Supplied with the option of either a 6mm steel floor plate or extended uprights for a more permanent ground installation. Two alternative roof pitches are available on this unit while the seating for 8 makes this unit the perfect meeting place.

The **Crescent Shelter** is half octagon shaped, built to the same high specification as the full Octagon unit and is ideal for limited space areas, this unit is offered with alternative lean back seats in addition to the standard flat topped type seats and again accommodates seating for 8.

Finish:

The shelters are finished by means of hot dip zinc galvanizing followed by a coloured polyester powder coated top coat, giving a long lasting maintenance free life span.

THE OCTAGON WITH PITCH ROOF

Providing a place for teenage children to meet sends a positive message to everyone in the community. These shelters are constructed using high specification gauge steel to ensure the greatest durability and maximum visibility.
